Attorney Docket No. 5051-653

In re: Jason C. H. Shih et al. Application No.: 10/661,172 Filed: September 13, 2003

Page 2 of 10

In the Claims:

- 1. (Currently Amended) A method of making a keratinase, comprising:
- (a) culturing a recombinant Bacillus in a media medium, said recombinant Bacillus selected from the group consisting of Bacillus licheniformis and Bacillus subtilis and having at least one heterologous kerA coding segment sequence inserted into the chromosome thereof, with said recombinant Bacillus producing greater quantities of keratinase than a corresponding wild-type Bacillus that does not have said at least one heterologous kerA coding segment sequence inserted into the genome thereof; and then
 - (b) collecting said keratinase from said media medium.
- 2. (Currently Amended) The method of claim 1, wherein said media medium comprises not more than 3% protein substrate.
- 3. (Currently Amended) The method of claim 1, wherein said media medium comprises 1% soy and 1% feather meal.
 - 4. (Canceled)
- 5. (Original) The method of claim 1, wherein said *Bacillus* is *Bacillus* licheniformis.
- 6. (Currently Amended) The method of claim 1, wherein said *kerA* coding segment sequence is a *Bacillus licheniformis* or *Bacillus subtilis kerA* coding sequence.
- 7. (Currently Amended) The method of claim 1, wherein said *kerA* coding segment sequence is a *Bacillus licheniformis kerA* coding segment sequence.
- 8. (Original) The method of claim 1, wherein said corresponding wild-type *Bacillus* is *Bacillus licheniformis* PWD-1.

9. (Currently Amended) The method of claim 1, said recombinant *Bacillus* having a plurality of said heterologous *kerA* coding segment sequence inserted into the chromosome thereof.

- 10. (Currently Amended) The method of claim 1, said recombinant *Bacillus* having from 3 to 5 of said heterologous *kerA* coding segment sequence inserted into the chromosome thereof.
- 11. (Currently Amended) The method of claim 1, wherein said recombinant *Bacillus* is a protease keratinase-deficient *Bacillus*.
- 12. (Currently Amended) The method of claim 1, wherein said *kerA* coding segment sequence is operatively associated with a constitutive promoter.
- 13. (Currently Amended) The method of claim 1, wherein said *kerA* coding segment sequence is operatively associated with a P43 promoter.

14.-30. (Canceled)
